

STELLARMASTERS

"Stellar Conspiracy", an observation by StellarMasters

StellarMasters come from the deepest depths of known galaxies, to scream their rage.

Born from an idea of Leekanthrope (guitars), followed by the faithful companions HellAxe (bass, producer) and Al Boar T (drums), joined by the madness of Axe Mountains (vocals), StellarMasters' voyage has just begun, following the route of the spaceship Emerald.

The first chapter of this adventure is "Stellar Conspiracy", eight heavy metal songs exploring the abyss of Cosmos with harsh vocals shouting loud their angriness.

Here's the tracklist:

01. To the Stars (intro)
02. Stellar Conspiracy
03. Orbiting Dream
04. Galactic Resistance
05. Space Merchants
06. Sidereal Abyss
07. Deep Black Firmament
08. Towards the Unknown (outro)

Heavy Metal maniacs, US Metal lovers, bewitched by the most legendary twin-guitar pairings, StellarMasters proudly poured out their love for old metal, without forgetting harmonies and dreamy atmospheres.
